

## Origin Story

---

Squid Game on Netflix.

The fandom and glorified show took the world by storm, but in reality, a storm had been brewing behind closed doors for thousands of years.

Squid Squad OGs: a secret society with members scattered through the entire Cosmos that came together in disguise to compete in a tournament of champions. Only the toughest were invited, and of those, only the most hardened left the tournament in one piece.

The Squid Squad OGs only played one game – a game that was as old as time to ensure that only the rawest senses were used and the most electrifying nerves were exposed.

The Squid Squad OGs heard about the Netflix show...

Then they heard about the Degens, apes, and rugpulls.

The OGs first scoffed, laughed, then grew angry.

But then realized that it was time for them to show the world how the real games were supposed to be played.

Groups formed under the mystical number of 4 - 5- 6, elimination tournament putting it all on the line.

The OGs are now inviting their companions to join them in a 3-round match of

**Rock**

**Paper**

**Scissors**

Winner takes all, or the group chooses life.

*The decision is within your hands and yours alone.*

## Minting Structure

---

There are 82,080 unique initial designs, of which 3,192 will be minted. The NFTs below will be minted on Solana.

<b>Squad</b>	<b>Number</b>	<b>Type</b>
1	456	Airdrop
2	456	Auction
3	456	Airdrop
4	456	Auction
5	456	Airdrop
6	456	Auction
7	456	Airdrop

## Ticket Based Game Selection System

---

Players will be able to purchase tickets that will allow for their participation in the games. Squads are determined via airdrops or auctions.

[DARC](#) is the currency that is accepted to buy tickets, which are necessary to participate in an airdrop or auction.

### **Airdrops**

Airdrop squads will use a selection system that will be a lottery ticket-based system. To participate in the airdrop of the NFTs, you must have a lottery ticket which may be purchased using DARC (token of Konstellation Network).

Each Solana wallet may hold a **maximum of 2 lottery tickets** for a specific Airdrop. The purchased lottery tickets will be used to select random recipients of the airdrops.

- Airdrop Lottery Ticket Price: **100 DARC**

All lottery proceeds will be gathered for the Prize Pool of that specific Squad.

### **Auctions**

Auctions squads will be selected through a usual NFT auctions process. All wallets will be allowed to participate in the auctions. The beginning of the bidding period will be communicated in advance.

## Gameplay Description

---

Each distinguished Squid Game OG is made unique by what is displayed and by their mystically imbued characteristics, which make them hardened players in the timeless game of Rock, Paper, Scissors.

Every Squid Game OG has three unique characteristics presented in the specific round they are playing in. These are called **RPS Strength (RPS)** and comprise three types of strength each for Rock, Paper, and Scissors.

The minimum value is 0, while the maximum value is +3. There are no negative values.

Game is:

- Rock, Paper, Scissors
- Both players may select either rock, paper, or scissors
- Each matchup comprises one round of Rock, Paper, Scissors

RPS Strength Example:

### Player 1

<b>Rock</b>	<b>+2</b>
<b>Paper</b>	<b>+1</b>
<b>Scissor</b>	<b>+3</b>

### Player 2

<b>Rock</b>	<b>0</b>
<b>Paper</b>	<b>+2</b>
<b>Scissor</b>	<b>+1</b>

### **Matchup:**

Gameplay: Player 1 plays Scissor; Player 2 plays Scissor

Result: Player 1 wins as his scissor strength is stronger. When the results are the same, the stronger value will win

## Rules for the Squid Game OG Free-For-All Games

1. Must participate in the lottery to be eligible for gameplay.
2. 2 wallets that hold an SSOG NFT are selected for a new match-up every day.
3. Each wallet may contain multiple SSOG NFTs, but an NFT currently playing in a match-up may not be selected.
4. The game selects pairs of all the participating NFTs for matchups every day (e.g., for the first round of the first squad, there will be 228 matches set up for 228 random pairs).
5. If a wallet contains multiple NFTs, all of the NFTs will be selected for the Match-Up.
6. Each pair has 24 hours to complete every match-up.
7. If any player does not select a move within a 24 hour period, the move of the strongest RPS strength will be selected for the player.
8. Every two matches, there will be a vote with the existing batch to continue the tournament, or to keep the NFT as is and to only be eligible for a portion of the prize pool. Refer to further details below.

### Number of Lives

Every player begins with a total of 2 lives. Every loss in a match-up or lack of participation in a match will decrease the number of lives by 1. Every two matches, the player has a random opportunity to have his life restored to two, with an 80% possibility of this happening.

When the number of lives is 0, the character (NFT) is destroyed and removed from the total collection.

## Ranking

Ranking is based on how many games the squid survive in total. The number of wins does not depend on consecutive wins. Players will receive a special badge on the NFT, increasing its rarity and desirability. Also, based on the player's rank, they might earn a higher weight of the prize pool at the end of the game.

<b>Badge Tier</b>	<b>Games survived Required</b>	<b>Perks</b>
No Badge	1 Games	No perks; Reward weight of 1
Silver Badge	2 Games	+1 to base stats; Reward weight of 2
Gold Badge	3 Games	+2 to base stats; Reward weight of 4
Squid Squad OG ("SSOG") Skull	4+ Games	+3 to base stats; Reward weight of 8

## OG Drops

OG Drops are extremely rare NFT drops that only occur to the champions that have made it the furthest. Higher ranks are permitted to participate in a lottery to receive rare drops. The higher the rank, the rarer the NFT drops become.

## Prize Pool

---

The Prize Pool is determined by the lottery system and a player incentive program.

### *Player Incentive Award Program*

Every batch will have a separate USDC based pool that will increase by \$100 every time a player is eliminated from the batch (i.e., NFT is burned). For example, if ten players are eliminated, the Player Incentive Award Program will equal \$1,000. If all the players vote to play till there is only one player standing, the Player Incentive Award Program will be \$45,600 (including the \$100 for the last player standing).

**Each batch will have a Player Incentive Award Program with a maximum of \$45,600 (to be paid in USDC).**

### *Airdrop Batches*

Airdrop batches have a prize pool that includes the total amount of proceeds from the lottery tickets that are purchased. All proceeds from the lottery for the airdrop will be aggregated and be included in the total prize pool for that particular squad.

### *Auction Squads*

Auction batches are a mixture of the total amount collected from the sale of Auction Ticket entries and 50% of the total proceeds being collected from the auction of the squad NFTs. The remaining 50% of the proceeds from the auction will be burned.

## The Vote

---

In the time-honored tradition, every two matches, all remaining players will be given the option to vote whether to continue the game or to cease the games as they currently stand.

- If more than 50% of the players decide to continue, the game will go on for an additional two matches. Lives will be refilled by +1 with a maximum value of 2 lives.
- If more than 50% of the players vote not to continue the game, the game for that squad will cease, and surviving players may keep their remaining NFTs.
- If the game does not continue, the prize pool will be distributed among the remaining players based on the formula below.

The distribution will be based upon the badges of the remaining players, with higher-ranking NFTs receiving larger portions of the share.

The prize pool at the end of the game will be calculated as follows:

$$\mathbf{((456 - \# \text{ of Remaining Players} + 1) / 456) \times (\text{Prize Pool})}$$

The distribution amount will be calculated as follows:

$$\mathbf{(\text{Prize Pool}) * (\text{Player's Reward Weight}) * (\text{Sum of Reward Weights of All NFTs})}$$

## FAQ

---

### **What is Squid Squad OG?**

Squid Squad OG is a collection of hardened players (the “**Squids**”) that have been through the wringer in life. Hardened by fire, they represent the contestants in the games, where you have a chance to try your hand at a life-changing moment. Or will the games take you too?

### **How many NFTs are there?**

There have been a total of 82,080 unique NFTs that have been hand-created. However, only 3,192 will be initially minted, representing 7 batches of 456.

### **How can I participate in the games?**

You must be of the lucky few that have been selected from the lottery to receive an airdrop of the NFT, or you must have won an SSOG NFT through auction. If you are the lucky recipient of the NFT, all future instructions about the games will be posted on the website and shared through social media channels.

### **What are the Squid Squad OG Games?**

Select few have been invited to try their hand at changing their fortune. With a player in hand, you’ve received a bizarre invitation to the timeless game of Rock, Paper, Scissors. Each match will be more intense than the last - with more riding on it every single time.

Each game will represent one step closer to life or death, and a winner takes all prize and ownership of the rarest of all Squid Squad OG NFTs.

### **How are the award amounts decided?**

The award amounts are based on the total number of lottery tickets that are purchased for participation in addition to the Player Incentive Award Program. Airdrop NFT lottery tickets are priced higher as they will not be required to be auctioned to purchase NFTs. Auction lottery tickets are priced lower, and the proceeds of the lottery tickets will go toward the total prize pool. 50% of the auction ticket proceeds will go toward the total prize pool.

### **Is it a winner-take-all situation?**

This is entirely up to the participants. Future games may also be created, but the remaining batch participants will be subject to The Vote to proceed with the game or to discontinue the SSOG games every two matches.

If more than 50% of the remaining participants vote to stop the game, all remaining NFTs will be released from any future gameplay, and 50% of the prize pool will be distributed according to the Airdrop Formula.

### **Where can I ask more questions?**

The Front Squad can be found at <https://discord.gg/Jg89rtvSfr>, where any questions may be addressed. Your fellow players may also be there, so beware!

## Timeline

---

- **February 8st, 2022 ~ February 13th, 2022**

Lottery period to participate in the first airdrop of Squid Squad OG.

- **February 14th, 2022 ~ February 20th, 2022**

Lottery selection period for which players will receive the airdrop.

- **February 21th, 2022**

First death match for Batch 1 begins.

*The timeline might evolve. Future airdrops and auctions will be announced through the website and social media channels.*
